	XL	35,5	38,5	47	10	33,5	185cm	100kg	38

All dimensions refer to non-covered versions.

Please note:

Dimension A is always measured at the point where the hard part of the hip bone touches the seat, and not at the narrowest point.

The constriction does not reflect a dimension that is decisive for the fit.

The narrow spot varies between 8 mm and 12 mm smaller than the critical dimension A

special sizes:

WT: The seat is wider in the chest area (area B).
